

## Instructions For Participants

### Infection Protection Measures

This recommendation applies equally to all people: to protect yourself and others from being infected with SARS-CoV-2, self-isolation in the event of illness, good hand hygiene, compliance with coughing and sneezing rules and keeping your distance (at least 1.5 meters) the most important and most effective measures.

#### **The following measures are valid by VTR-(3G)-Access-Regulation:**

(VTR = vaccinated or tested or recovered)

**Lingering in the seating area of the hall and visiting the catering units at the Areal Böhler Park is only possible with status 2G+** (3x vaccinated, 2x vaccinated and recovered within the last three months, 2x vaccinated or recovered plus negative test result valid for the day)

#### **If you suspect illness, please stay away from the event**

In particular, coughs, runny nose, hoarseness, headache and pain in the limbs or increased temperature > 37.4 °C can be signs of an infection. Please protect your fellow human beings and stay away from the event if you have symptoms.

#### **Mask requirement**

- In general, it is compulsory to wear at least **a FFP2 mask** (without valve) indoors.
- Everyday masks, face screens or similar are NOT permitted.
- This obligation also applies outdoors in queues and queuing areas.

The only exception is the visit to gastronomic offers.

- There, the mask can be removed at the **permanent seat or standing area** for the duration of the consumption.

#### **Distance recommendation (at least 1.5 meters) to other people**

Please make sure you keep your distance from your fellow human beings and follow the directional signs at the event.

#### **Wash hands regularly and thoroughly with soap**

This recommendation applies equally to all persons: after contact with body fluids (e.g. sneezing, blowing your nose), after using the toilet, after removing protective clothing (gloves, mouth and nose protection). Rub in soap for about 30 seconds, considering the wrists, spaces between the fingers, fingertips, thumbs and the nails. Sufficient washing facilities are available at the event. You will also find hand disinfectant dispensers in the sanitary facilities and at the entrances.

#### **Keep hands away from face, eyes and mouth - do not shake hands**

Mouth / nose contact with contaminated hands increases the probability of infection. Please try to keep your hands away from your face. Please refrain from shaking hands and other physical contact with other people. Please sneeze in the crook of your arms.

#### **Cover wounds with plasters or bandages**

If you have wounds, please cover them with suitable plasters or bandages. Our paramedics will be happy to answer any questions you may have.

**Please also pay attention to the notices.**
